***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I. Claims 1-22, drawn to a stapler having a specific former assembly, classified in class 227, subclass 82.

Group II. Claims 23-36, drawn to a stapler having a specific bend plate assembly, classified in class 227, subclass 85.

Group III. Claims 37-49, drawn to a stapler having a specific driver assembly, classified in class 227, subclass 87.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions of Group I and Group II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, the former assembly of Group I has separate utility such as the actual formation of the stapler that is capable of being shaped by the bending plates of Group II. See MPEP § 806.05(d).

Inventions of Group I and Group III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, the former assembly of Group I has separate utility such as the actual formation of the stapler that is capable of being fed by the driving assembly of Group III. See MPEP § 806.05(d).

Inventions of Group II and Group III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, the bend plate assembly of Group II has

separate utility such as the actual shaping of the stapler that is capable of being fed by the driving assembly of Group III. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II and Group III, restriction for examination purposes as indicated is proper.

A telephone call was made to Richard Kaiser (Reg. No. 46,158) on May 20, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
